Animal Communication Mastery Series Description and Tracks

This series of six compact disc recordings on four major topics covers the theory and practice of directly communicating mind-to-mind and heart-to-heart with other species. Break through the layers of cultural conditioning that inhibit clear reception of communication from animals. Solve problems and understand your animal companion's behavior. Deepen mutual understanding and cooperation. Filled with timeless and many-layered wisdom, you can listen to these recordings again and again for growth in understanding and skill. Your animal friends may want to listen along with you. The wealth of knowledge and insight on these recordings has helped many animal communicators begin their careers and improve their professional practice.

Testimonials

The *Animal Communication Mastery Series* helped me form the core of the beliefs that I had been searching for. I knew animals had thoughts, feelings and emotions but I thought I stood alone. Penelope Smith's words recorded in this series have become ingrained in my being as I am in touch with animals on a daily basis. They became a teaching guide and kept me in touch with a true reality.

Anita Curtis, author of *Animal Wisdom*

Penelope Smith is one of the best known and most experienced animal communicators in the world. Most other communicators have read her books and a great many have trained with her. With the *Animal Communication Mastery Series*, Penelope Smith offers the gift of her insight and experience in training communicators, as well as supporting animal guardians in developing deeper respect for and understanding of their animals. This audio series is a tremendous boon to both beginning and experienced communicators. The exercises enable listeners to communicate with their animals in very real and accurate ways and the amount and quality of information about animal awareness and understanding is exceptional. I often return to these recordings myself for suggestions and ideas about delving deeper into our connection with all life.

Barbara Janelle M.A., author of *Embodiment of Spirit: Learning through Therapeutic Touch and Interspecies Communication*

Penelope Smith's audio recordings were the key to unlocking a door which opened to a world I had long ago hidden away. At a time in my life when I wasn't sure what I was going to do or where I was headed, I sat down to listen to the *Animal Communication Mastery Series* and found myself unable to put it aside. Penelope shares her years of insights and wisdom into the

many facets of interspecies communication. Hearing her stories and examples reminded me of a part of myself that I had shut off many years before, when I somehow felt that what I was experiencing wasn't "normal." Penelope helped me to see that not only was it acceptable to experience these things but that world was still alive and well within me and just bursting to be set free. Listening to her words helped me to give myself permission to open the door once again. Then my world expanded beyond measure with the peace, love, and joy from the animal and nature kingdom. Experiencing the Animal Communication Mastery Series changed my life forever and led me on the path to becoming a professional animal communicator and to share this natural ability with others.
